

# Enhance your skills, methodology and safety performance

Guardrails® CQI Reporter software

## Overview

The Guardrails® CQI Reporter software workshop provides advanced training for hospital pharmacists, nursing managers, risk managers and quality officers to expand beyond their basic Guardrails CQI Reporter software training. The workshops are three-day seminars, held throughout the continental United States.

Each hospital that has Optimization Services can send up to two participants at no cost. Additional participants and hospitals with basic software maintenance programs can attend with a tuition cost of \$750 per person. Travel expenses are the responsibility of the participants.

***“The CareFusion staff was able to provide an experience that met all of my adult learning needs, while providing an outstanding educational program. I left the workshop with a new insight into using the CQI data at my institution for patient safety improvement projects.”***

**Bonnie Miner, MS, RN, CNS**

Pediatric Safety Officer

Nursing Quality and Patient Safety

Upstate University Hospital, Syracuse, NY

**Alaris®**

*“The CareFusion workshop I attended was well thought-out, presented and engaging. The hands-on analysis exercises with our data and the discussion with peers from other organizations (and countries) were fun, interesting and invaluable—plus, I picked up a few tips that help me in working with other data sets. Terrific!”*

**Patrick Locke**

St. Joseph Health System  
Eureka, CA

## CQI workshop registration information

Listed below are the CQI workshop dates for 2012. Workshop-specific information (specific location, lodging, start/end times, etc.) is located within the registration sites.

### New for 2012

Embassy Suites Phoenix Airport	Jan. 24-26	<a href="http://www.seeuthere.com/CQI_Phoenix_2012">http://www.seeuthere.com/CQI_Phoenix_2012</a>
Embassy Suites Secaucus	March 6-8	<a href="http://www.seeuthere.com/CQI_NewJersey_2012">http://www.seeuthere.com/CQI_NewJersey_2012</a>
Hilton Suites Magnificent Mile	May 8-10	<a href="http://www.seeuthere.com/CQI_Chicago_2012">http://www.seeuthere.com/CQI_Chicago_2012</a>

Hilton Cincinnati Airport	Sept. 11-13	<a href="http://www.seeuthere.com/CQI_Cincinnati_2012">http://www.seeuthere.com/CQI_Cincinnati_2012</a>
Embassy Suites Dallas Fort Worth	Nov. 6-8	<a href="http://www.seeuthere.com/CQI_Dallas_2012">http://www.seeuthere.com/CQI_Dallas_2012</a>

Note: Please use this registration link to also book hotel rooms. Confirmation numbers will be sent directly from the hotel after the rooming list is submitted to the CareFusion group room block. Confirmation numbers will be sent two weeks prior to the workshop date. Do not contact the hotel directly.

### Workshop objectives:

- Enhance your skills in creating clinical practice information from key Guardrails CQI Reporter software data
- Prioritize and develop performance improvement projects with the highest safety and economic benefit to ensure operational excellence using Guardrails CQI Reporter software data
- Define and create a systematic approach to analyzing Guardrails Reporter software alerts and refine drug libraries, dose limits and clinical advisories to achieve maximum impact for your organization
- Identify and help reduce adverse drug events throughout your organization by tracking potential adverse drug events through the Guardrails CQI Reporter software
- Share knowledge with peers using Guardrails CQI Reporter software data through hospital guest speaker presentations
- Demonstrate understanding of the Guardrails CQI Reporter software
- Review sample Infusion Analytics Service report

### Prerequisites for the workshop:

- Basic understanding of the Guardrails CQI Reporter software
- Basic understanding of Microsoft Excel functionalities, such as sort, copy and paste, auto fill and auto filter

This class only covers Guardrails CQI Reporter software v.9 and higher. For more information, please contact your CQI Manager.
