

# MaxGuard® T-connector extension sets

Featuring Tru-Swab® technology

## MaxGuard® extension sets

MaxGuard T-connector extension sets, available with MaxPlus® clear connectors, feature Tru-Swab® technology for safe and easy access to the IV line. To prevent inadvertent rupture during procedures requiring pressure, sets with pressure rated tubing are also available.

MaxGuard T-connector extension sets allow for direct access in emergency situations and close proximity to the patient for drugs with a short half-life.

MaxGuard®

## Safety

- Swabbable to help prevent contamination
- Luer-activated needleless connector
- Clear material for easy visualization
- DEHP and latex-free

## Convenience

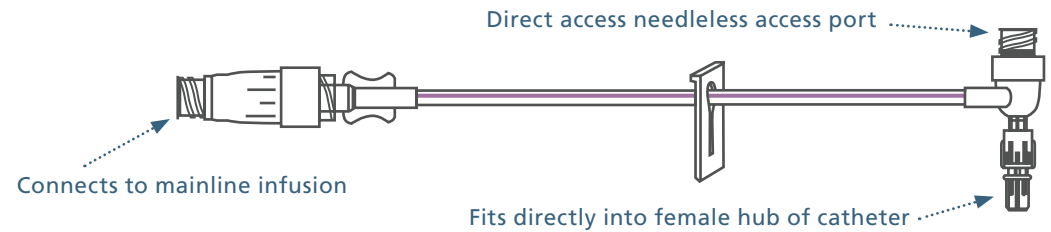

- Direct access site for immediate venous delivery
